

# 3 Stages Of Interviews

## Before the interview

Always make sure you execute in depth research

Bring an extra copy of your resume, keep it tidy in a folder

Know exactly where it is you're going – do a test run the day before

Turn your phone off

## During the interview

Make a good first impression by dressing well, giving firm handshakes and smiling

Be prepared to tell them about yourself – come ready with a story that shows off your personality and relevant skills

Stay positive – don't get baited into negative subjects or talking down on people

Leave the subject of money until the interview gets flowing, you don't want to ask this during the early parts of an interview

Make sure you research what your salary should be and have facts to back yourself up

## After the interview

Always send a thank you letter – even if it went bad

Don't talk about the interview on social media
