## **Technology Support Guide** for Provider Organizations

Inclusa is committed to adopting a technology first approach to personcentered planning. We have a great opportunity for our valued providers to learn, explore, and evolve their service offerings along with us. Please take the opportunity to view the following modules to support you in incorporating a technology first approach in your service delivery. These modules are for both leadership and direct support professionals within your organization.

Organizations that complete the five modules and survey will receive a certificate of completion. We'd also encourage providers that are interested in pursuing this further to reach out to Inclusa's <u>innovation@inclusa.org</u> mailbox and we can begin exploring those opportunities together!

- Module 1: Technology First Guiding Principles for Wisconsin Module 2: Person-Centered Assessment Module 3: Technology 101: Types of Technology Module 4: Successful Organizational Implementation of Technology - Part 1 Module 5: Education, Implementation, and On-Going Assessment - Part 2
